

Business Insights & Recommendations

Page 1 – Overview

1. Revenue by Category

Observation

The **Classic** category generates the highest revenue and records the highest sales volume among all pizza categories.

Business Insight

This indicates **strong and consistent customer demand** for Classic pizzas, making them one of the company's most valuable product categories.

Recommendation

- Continue promoting Classic pizzas through featured menu placements and seasonal campaigns.
 - Introduce combo meals with Classic pizzas to maximize revenue while maintaining customer interest.
-

2. Orders by Weekday

Observation

Friday records the highest number of customer orders.

Business Insight

Customer demand peaks before the weekend, making Friday the busiest sales day.

Recommendation

- Launch Friday-exclusive combo offers and limited-time promotions.
 - Increase marketing efforts before weekends to maximize customer traffic and revenue.
-

3. Orders by Month

Observation

Order volume fluctuates throughout the year, peaking in **July**, declining between **August and October**, recovering in **November**, and dropping again in **December**.

Business Insight

The business experiences seasonal demand fluctuations that may affect overall sales performance.

Recommendation

- Investigate the factors contributing to the August–October decline.
 - Introduce seasonal campaigns and promotional offers during lower-demand months.
-

4. Revenue by Pizza Size

Observation

Large-sized pizzas contribute the highest revenue among all pizza sizes.

Business Insight

Customers show a clear preference for Large pizzas over Small, Medium, XL, and XXL sizes.

Recommendation

- Promote Large-size combo meals and family offers.
 - Upsell beverages, desserts, and premium toppings to increase Average Order Value (AOV).
-

Page 2 – Revenue Analysis

1. Top 5 Revenue-Generating Pizzas

Observation

The Top 5 pizzas each generate **more than 35K** in revenue.

Business Insight

These pizzas are the primary revenue drivers and demonstrate strong customer acceptance.

Recommendation

- Maintain consistent product quality.
 - Highlight these pizzas in promotional campaigns.
 - Feature them in premium combo meals and menu recommendations.
-

2. Bottom 5 Revenue-Generating Pizzas

Observation

The Bottom 5 pizzas generate significantly lower revenue, with the lowest-performing pizza contributing only around **11.6K**.

Business Insight

These products show comparatively weak commercial performance. However, the available data does not identify the exact reason for their lower revenue.

Recommendation

- Investigate customer preferences, pricing strategy, menu visibility, and promotional effectiveness.
 - Review recipe composition and product positioning before making pricing decisions.
-

3. Revenue Gap Analysis

Observation

Top-performing pizzas generate more than **35K**, while bottom-performing pizzas generate between **11.6K** and **15.6K**.

Business Insight

A significant revenue gap exists between the highest and lowest-performing pizzas.

Recommendation

- Bundle lower-performing pizzas with best-selling products to increase customer exposure.

- Monitor sales performance after promotional campaigns and evaluate customer response.
-

Page 3 – Popularity Analysis

1. Premium Revenue Drivers

Observation

California Chicken and **Spicy Italian** generate high revenue despite lower purchase frequency.

Business Insight

These pizzas appear to generate higher revenue per purchase, suggesting they may be premium or higher-value menu items.

Recommendation

- Improve menu visibility for these pizzas.
 - Promote them through premium meal deals and targeted marketing campaigns.
 - Identify customer segments that prefer premium products.
-

2. High Demand, Lower Revenue Products

Observation

Hawaiian and **Pepperoni** rank among the Top 5 in Orders and Quantity but do not appear among the Top 5 in Revenue.

Business Insight

These pizzas enjoy strong customer demand, but their revenue contribution is comparatively lower.

Recommendation

- Increase Average Order Value through premium toppings, meal bundles, and cross-selling.
 - Evaluate pricing strategy only after further customer and pricing analysis.
-

3. Star Performers

Observation

Thai Chicken, BBQ Chicken, and Classic Deluxe consistently appear among the top performers across Revenue, Orders, and Quantity Sold.

Business Insight

These pizzas demonstrate strong and consistent customer demand while contributing significantly to overall business performance.

Recommendation

- Maintain product quality and availability.
 - Prioritize these pizzas in marketing campaigns and featured menu placements.
 - Use them as anchor products in promotional bundles.
-

4. Product Performance Comparison

Observation

Products that generate the highest revenue are not always the most frequently ordered.

Business Insight

Revenue, Order Count, and Quantity Sold measure different aspects of product performance and should be analyzed together for better decision-making.

Recommendation

- Evaluate product performance using multiple KPIs rather than relying on a single metric.
 - Support pricing and marketing decisions with comprehensive sales analysis.
-

Overall Business Recommendations

- Continue investing in top-performing pizzas to sustain revenue growth.
- Improve the visibility and promotion of lower-performing pizzas before considering pricing changes.
- Introduce strategic combo meals by pairing high-performing pizzas with lower-performing products.

- Capitalize on Friday's high customer demand through exclusive weekend promotions.
- Increase Average Order Value by promoting Large-size pizzas with premium add-ons and meal bundles.
- Investigate seasonal sales fluctuations to better plan future marketing campaigns.
- Use Revenue, Orders, and Quantity together to make balanced business decisions rather than relying on a single KPI.
